

**Wednesday 2008 Morning Watch
listen for YOUR Music
and Dance!**

It's blowin' in the breeze,
and it's blowin' through the trees,
Do you hear it?

Morning Watch is perhaps the best time possible to hear YOUR Music. If we are quiet enough, and if the people in the lodge tone their noise down, maybe you will indeed be able to hear it!

It is so important that we eventually hear our own special Music. It is wonderful if we hear it when we are 6th graders, but also just as important if we are 60! Grandma Moses was way over sixty when she began painting, and Colonel Sanders used his social security money to begin his restaurants. Both are now household names. So if you are still wondering what your place in this world is, don't worry. There is time.

One day, many years ago, Boonie was driving along telling Janny about his latest dreams--which were pretty far out! Janny said, "Honey, wouldn't it be wonderful if someday you could actually get a job that would let you utilize all of those crazy ideas?"--And HE DID! Indeed the young man who never finished college, and who started in the warehouse at Copco Papers, ultimately became an executive with that company and his crazy ideas sent him around the world! (Many of these ideas had been fostered at C.A.M.P., by the way.) So don't think that all those ideas that come into your head are necessarily crazy or impossible. You may be hearing YOUR Music!

Listen for YOUR Music---and Dance!
